SUMMARY

Student at Santa Clara University with experience in software, data engineering and application development. I am a technology enthusiast constantly exploring opportunities to learn and develop cutting edge technology. With my proven track record of problem-solving and data-driven decision making, along with strong team collaboration, I am seeking to advance my career in the **data** field.

WORK EXPERIENCE

Algonomy Software Private Limited, *Business Intelligence Analyst Intern, Bangalore, India*

Jan 2024-May 2024

- Focused on the sales analysis of non-food items (toys, clothing, groceries) in a designated region, leveraging data to uncover trends and insights that informed business strategies.
- Collaborated with the team to gather sales data from customers, leveraging ETL processes to extract, transform, and load data into structured tables using SQL Workbench, enabling comprehensive analysis.
- Translated complex data into visually appealing and interactive **dashboards in Power BI**, enabling clear communication of key metrics.
- Presented the finalized dashboards to the team, incorporating feedback from peers and management. Successfully secured approval from my manager before delivering insights to clients

Sybmio Generrics, *Business Analyst Intern, Bangalore, India*

July 2023 – Dec 2023

Analyzed historical data on active pharmaceutical ingredients (APIs), while collaborating with import, export, and finance teams to gather insights. Utilized **MS Excel** techniques—such as sorting, filtering, and pivot tables to identify key cyclic trends and transform raw data into actionable business intelligence. Developed visual **dashboards** to effectively communicate findings and enhance team discussions on operational performance.

UMaster, *Data Analyst Intern, Canada (Remote)*

Dec 2022 – May 2023

Performed Managed and analyzed data from laboratory experiments, applying statistical techniques to identify patterns, trends, and correlations. Proficient in using Excel to organize and manipulate data, leveraging functions like SUMIFS to extract valuable insights for informed decision-making.

EDUCATION

Master of Science, *Information Systems*

May 2026

Santa Clara University, Leavey School of Business, Santa Clara, CA

Courses: Object Oriented Programming with Java, Data Analytics with Python, Financial Accounting

Bachelor of Technology, Computer Science and Engineering

June 2024

PES University, Bangalore, India

GPA: 3.31

Courses: Database Technologies, Machine Learning, Data Structures, Computer Networks, Software Engineering, Cloud Computing.

PROJECTS

Chess Puzzle Generator – Research Project (Python, JupyterLab)

May 2024

- Analyse chess players' gameplay data through algorithms to identify weaknesses and mistakes and recommend tailored chess puzzles to enhance skills and strategic thinking.

Words mouth App (Java, Android Studio)

Dec 2023

- Collaborated with doctors, teachers, and specialists to create a language-learning app, designed to support autistic children in learning daily conversational vocabulary through interactive routes and real-life imagery.

Covid-19 Bed Slot Management (DBMS) (Python, Stream-Lit)

May 2023

- Developed a project to assist users in booking COVID-19 hospital beds, allowing them to check bed availability via the UI by submitting personal details (name, age) for booking.

Fake News Detection (Python)

Dec 2022

- Th fake new detection project aims to identify and flag false information by utilizing Machine Learning Algorithms such as Gradient Descent, Random forest, Decision tree.

SKILLS

Programming/Scripting Languages: Python, C, Java, HTML, CSS, Shell Scripting

Software and Tools: Android Studio, Visual Studio Code, JupyterLab, PyCharm, Google Cloud

Database: MySQL, MongoDB, Streamlit

Data Analytics: SciPy, NumPy, Matplotlib, Pandas, Hadoop, Apache Spark, Apache Hive, Kafka
